THE ENGENHO

The Engenho Dom Tápparo began through the initiative of Mr. José Tapparo that in 1978 decided to produce cachaça as a gift for his family and friends

The cachaça was so successful that they began to want to buy it. Then José Tápparo saw in this a business opportunity.

As the years went by and the second generation of the family arrived, the engenho grew and started producing several types of cachaças, alcoholic cocktails and liqueurs. Today, it counts on the collaboration of the third generation of the Tápparo family.

All products (cachaça and cachaça derivatives) are manufactured on the Tápparo family property. The woods used in the aging process are European oak, American oak, and Brazilian woods such as peanut, amburana, and jequitibá.

Engenho Dom Tápparo's portfolio includes a wide variety of products, including cachaças, many alcoholic cocktails, and more than 20 flavors of liqueurs, adding up to more than 40 beverage options and a complete line of emporium and accessories.
